Portfolio

Professional Summary

Results-driven BCA student specializing in Computational Science with hands-on experience in software development, Artificial Intelligence, and Machine Learning. Proven ability to design, engineer, and deploy scalable applications backed by data-driven models. Seeking an entry-level software development or AI/ML role to contribute to impactful, production-ready solutions.

Internship

AI & Machine Learning Intern

Dec 2025

iBase Electrosoft LLP

(150 Hours – One Month)

- Gained industry exposure to Artificial Intelligence and Machine Learning through structured training
- Solved real-world problem statements using supervised learning techniques
- Applied ML workflows including data preprocessing, model training, and evaluation
- Demonstrated strong ownership, fast learning ability, and consistent task execution

Technical Skills

Programming: Python, Java, C++

Web & Backend: Django, Flask, React, Node.js, REST APIs

AI / ML: TensorFlow, PyTorch, Scikit-learn, NLP, Computer Vision

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Git, CI/CD

Concepts: MLOps, Generative AI, Agile/Scrum, Linux

Projects

Fake Reviews Identification System | Source Code | Live

- Engineered an ML-based fraud detection system achieving **95% classification accuracy**
- Applied sentiment analysis and behavioral pattern modeling to identify fake reviews
- Analyzed and processed **100,000+ reviews** with real-time inference capability

AI Medical Consultancy System (Internship Project) | Source Code | Live

- Designed an AI-driven medical consultancy platform for preliminary health assessment
- Trained symptom-based disease prediction models using supervised learning algorithms
- Delivered real-time predictions with average response time under **2 seconds**
- Deployed the application on cloud infrastructure for public accessibility

BashaConverter (Company Project) | Source Code | Live

- Built a multilingual language translation system leveraging NLP and ML algorithms
- Improved cross-cultural communication efficiency by **40%** through optimized processing

AI Desktop Assistant – Kirito 1.0 | Source Code

- Architected an AI-powered desktop assistant enabling voice-based interaction and automation
- Integrated speech recognition, text-to-speech, and NLP pipelines for command execution
- Automated system-level operations including application control, file handling, and web search
- Connected external APIs to fetch real-time data such as weather, news, and user queries

Education

Bachelor of Computer Applications (BCA) |

Expected 2026

G. H. Rasoni Institute of Engineering, Jalgaon

Achievements:

- Shark Tank Winner – 1st Prize (2025)
- Shark Tank Runner-up – 2nd Prize (2024)
